Invitation Kick-off Workshop

Validation of Metrics-Based Quality Control

Overview

Date/Location

Date: 20th of February 2006
Time: 9.30h – 13.30h
Location: Knuth, B-building, Växjö University

Participants

ARiSA: Rüdiger Lincke, Welf Löwe
CombiTech: Karlsson Kijell
Windh: Emil Eifrem
Other partners: are very welcome

Purpose

Discussion of available information and technical realization of Quality Monitor installation allowing a detailed partner specific planning and realization under consideration of the individual infrastructures. Discussion of First Contact Analysis (FCA) and relevant analysis goals. Discussion of refined project plan to be submitted to KK-foundation.

Agenda

9.30h	Breakfast
9.45h	Opening remarks Speaker: Welf Löwe Outlining the motivation for and goals of this workshop and summarizing the current status of the project.
9.55h	Presentation of ideal scenario from ARiSAs' point of view Speaker: Rüdiger Lincke ARiSA receives the complete source code and all build instructions, then performs a FCA and adjusts the analysis and Quality Model to the project. Integration of the Quality Monitor with our Quality Model on partner side in the build process to derive metrics. ARiSA has remote access to the Quality Monitor to perform updates and adjustments. Stressing of requirements.
10.15h	Discussion of technical feasibility Speaker: Rüdiger Lincke Technical feasibility shall be discussed with the partners. In particular: How does the infrastructure (in particular build environment) look like, how can we access the code, retrieve results and push updates. How well can the requirements stressed in the ideal scenario be satisfied, what alternatives are available.
11.15h	Coffee break
11.30h	Presentation and discussion of analysis Speaker: Rüdiger Lincke What additional information (e.g. bug, test, cost...) is available, in what format, how can it be accessed. What can we derive from this information and what relevance does it have for the partners. Example FCA Report.
12.30h	Discussion of report to KK-foundation Speaker: Welf Löwe Discussion of revised Project Plan, how are the results made available to the partners, suggestion refined project plan including contribution and benefit of partners.
13.00h	Closing session Summary of the workshop, discussions and how to proceed.
13.30h	Lunch at restaurant Rasken
